PROFILE

Capital markets techno-functional consultant, 10 years across both sides of the platform relationship: eight years at FinIQ Consulting delivering trading, OMS and wealth platforms across 8 bank implementations in 6 countries, then a direct advisory contract with BBVA on platform capability, core banking integration and regulatory constraint mapping. NISM certified in Equity Derivatives and Fixed Income Securities.

CORE EXPERTISE

Products Equity derivatives · Structured products · Bonds · T-bills · Certificates of deposit · Mutual funds · FX — private banking, retail brokerage, wealth, treasury

Platforms FinIQ OMS and structured products suite · Front, middle, back office workflows · Core banking integration · API and interface design · Data migration · SQL · JIRA

Delivery Platform capability assessment · Requirement-to-solution mapping · Gap, constraint and regulatory limitation analysis · BRD/FSD authoring · Product configuration · SIT and UAT · Release management

PROFESSIONAL EXPERIENCE

BBVA | Mar 2025 – Sep 2026

Techno-Functional Consultant — independent contract · Remote

- Engaged directly by the bank to assess FinIQ platform capability against business requirements and map integration paths into core banking systems — data flows, interface points, dependencies.
- Translated requirements into solution designs bounded by platform capability and regulatory constraints, flagging gaps requiring workaround or customisation; sole interface between bank stakeholders and vendor technical teams.

FinIQ Consulting | Aug 2016 – Mar 2025

Senior Business Analyst / Product Lead · Dubai, UAE — onsite in Kuala Lumpur, Singapore, Jakarta

Emirates NBD — Business Analyst | Jan 2023 – Mar 2025

- Led platform build for equity, bond and mutual fund trading across private banking and retail segments, spanning multiple group entities.
- Owned requirement gathering, product design and BRD/FSD authoring for front and back office OMS; coordinated integration and data migration with bank IT and vendor teams.

Mashreq Bank — Business Analyst / Product Configuration | Mar 2021 – Mar 2025

- Designed order placement, migration and trade lifecycle flows for bonds, equities, T-bills and CDs; configured the product range through to production sign-off.
- Delivered high-volume migration of client and position records with zero data integrity incidents; primary client contact for SIT and UAT across four years of releases.

Bank Mandiri — Business Analyst / Product Lead | Mar 2022 – Jan 2024 · Onsite, Jakarta

- Delivered end-to-end requirements, demonstrations and project costing for a bond trading platform; managed integration across upstream and downstream systems.

Kotak Mahindra Bank — Business Analyst / Product Lead | Mar 2022 – Jan 2024

- Requirement gathering and product design for a back office OMS supporting retail API trading platforms, covering order workflow and front-to-back reconciliation.

Earlier engagements | Aug 2016 – Mar 2021

- Standard Chartered Bank — China business (onsite, Kuala Lumpur) and APAC, Middle East & UK: release delivery and requirement analysis for equity structured products; interface and API configuration across the order lifecycle.
- United Overseas Bank, Singapore (onsite): release management for bond and equity order placement and execution. CIMB Bank: regression testing and product configuration support for equity order systems.
